## **DETAILED ACTION**

### **Notice of Panel Decision from Pre-Appeal Brief Review**

Applicant's Response, see Notice of Panel Decision from Pre-Appeal Brief Review, filed 27 July 2009, with respect to rejection under 35 U.S.C. Section 103(a) have been fully considered and are persuasive. The rejection under 35 U.S.C. Section 103(a) of 27 July 2009 has been withdrawn.

### ***Status of the Claims***

Claims 1, 6, 30-32, 36-38, 47-48, 51 and 52 and 59, and 60-62 are pending further prosecution on the merits. Claims 27-29 are withdrawn from further consideration.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 30, 31, 32, 36-38, 47-48, 51 and 52 and 59, and 60-62 are rejected under 35 U.S.C. 102(b) as being anticipated by Sokoll et al. (WO 98/28357).

Sokoll et al. teach copolymers designed for use as particulate carriers containing functionalizable amino acid subunits for coupling with targeting ligands are described. The

copolymers are polyesters composed of alpha -hydroxy acid subunits such as D,L-lactide and pseudo- alpha -amino acid subunits which may be derived from serine or terpolymers of D,L-lactide and glycolide and pseudo- alpha -amino acid subunits which may be derived from serine. Stable vaccine preparations useful as delayed release formulations containing antigen or antigens and adjuvants encapsulated within or physically mixed with polymeric microparticles are described. The particulate carriers are useful for delivering agents to the immune system of a subject by mucosal or parenteral routes to produce immune responses, including antibody and protective responses (abstract only).

Claims 2-5, 33-35, 39-46, 49-50, and 53-58 are not fairly taught by the prior art.
